Timo Heikkilä

UNITY DEVELOPER | VR & XR | C#

Berlin, Germany | +358 40 419 8081 | timo.heikkila@hotmail.com
Portfolio LinkedIn GitHub

PROFILE

Unity developer with 5 years of experience across 30+ immersive applications and games, including standalone and PC VR. Hands-on work spans C# gameplay and XR systems, performance optimization, multiplayer, and volumetric media integration. Delivered features from prototype through release alongside artists, designers, and producers.

TECHNICAL SKILLS

Development Unity, C#, URP, gameplay systems, UI, Netcode for GameObjects

XR platforms Meta Quest, PICO, SteamVR, OpenXR, XR Interaction Toolkit

Performance & media Unity Profiler, standalone VR optimization, volumetric video, 3D scan integration

Production tools Git, Blender, iClone

Additional technologies Python, JavaScript, PostgreSQL, Docker, Microsoft Azure

AI-assisted development Claude Code, Codex

PROFESSIONAL EXPERIENCE

Unity VR Developer | INVR.SPACE GmbH — Jul 2022 - Present

Berlin, Germany

- Built and shipped Unity/C# VR applications for Meta Quest and PC VR, taking features from prototype through device testing and release with artists, designers, and producers.
- Implemented XR interaction, UI, locomotion, gameplay, and multiplayer systems, including Netcode for GameObjects.
- Built gameplay systems and production mechanics in an existing PC game codebase, integrating and refining features within a larger framework.
- Took over Unity implementation of a Quest 2/3 installation: integrated volumetric footage, optimized playback, and resolved third-party plugin issues.
- Investigated memory use in external plugins and DLLs; profiled and optimized assets and runtime performance for standalone headsets.
- Ported 360° video experiences to Quest and built custom encryption and decryption for protected media playback.
- Led Unity development, including interaction and UX implementation, for a VR production that won the 2025 European XR Awards Best User Experience.

Unity VR Developer | Triple Take Games — Oct 2021 - Mar 2022

Helsinki, Finland | Internship

- Developed a multiplayer VR game with minigames and player-focused mechanics.
- Refined interaction flow and VR comfort, including changes to reduce motion discomfort.
- Optimized and refactored Unity/C# code and built internal development utilities to improve maintainability and iteration speed.

EDUCATION

Bachelor of Business Administration, Business Information Technology | Haaga-Helia University of Applied Sciences, Helsinki | 2018-2022

Major: Software Development
